**Las Colinas - Irving, TX (June, 2009) – ([www.negma.net](http://www.negma.net))** Negma Business Solutions, Inc., a leading international internet provider, data center operator and managed services company, is proud to announce a joint Partnership with Clear Channel Satellite's Data Center located in Englewood, CO. and Comprehensive Communication Services, LLC located in Rockwall, TX. This new partnership gives Negma the expansion that it needs to offer a second location outside the state of Texas and expands on our services available to our customers to allow us to provide Hosted Disaster Recovery Dial Tone and Hosted Mass Notification Services.

Clear Channel Satellite offers a Class A data center facility in Englewood, CO and has been the home to thousands of Clear Channel Satellite customers. Their secure state-of-the-art 20,000 square foot facility includes multi-homed data connectivity by fiber and satellite. Their systems are backed up by a 750 KVA Diesel Generator and a 10,000 amp DC Power Plant. Clear Channel Satellite's 24x7x365 Network Operations Center is well known for their engineering expertise and unparalleled customer service.

Comprehensive Communication Services is a Dallas based company that focuses on providing communication solutions for disaster recovery and business continuity. They are a prime contractor for Fortune 500 companies including AT&T and Avaya, Inc. and have a large base of customers including the New York National Guard, City of La Porte Texas, Texas Department of Transportation, Avaya's Federal Solutions Team, Houston ISD, and many more.

These partnerships enhance Negma's position as an industry leader with a large and growing customer-base and a comprehensive portfolio of products and offerings. The corporate presence for Negma will continue to be operated in the DFW location inside Irving, TX.

"This is a strategically significant move for Negma, as we continue to scale our business partnerships and relationships, aggressive facility expansions and consistent organic growth," said Karim Naguib, president and chief executive officer of Negma. "With this partnership, we expand our offerings for Disaster

Recovery solutions and expand the delivery of Managed Services business and move forward with a strong commitment, focusing on growth and exceeding customer expectations. The partnership also adds further depth to our growing business continuity and IT compliance solutions and strengthens our services capability.

The partnership with the Clear Channel Satellite Data Center facility is in keeping with Negma's newly announced strategy on expansion. The intent is to expand by attaining and partnering with other colocation/datacenters in the continental USA with loyal customer bases who can benefit from the economies of scale that Negma can provide for their operations. Negma's practice of building a personal relationship with **each** of their clients has earned them a reputation for providing superior customer satisfaction.

### **About Negma**

Negma is a data center operator firm that provides managed colocation, enterprise services, web hosting, redundant connectivity and a wide range of managed services from its enterprise-class data center in the DFW metropolitan area. They provide a local solution for outsourcing data center services that lowers costs, and maximizes internal resources while allowing an organization to keep its valuable information technology assets in close proximity. The company has a well-earned reputation for partnering with its clients to provide cost-efficient technology solutions that achieve success through innovation, communication and successful collaboration.
